Protocol Update 003 — Improve UX

Published: August 29, 2025

Link: https://blog.ethereum.org/en/2025/08/29/protocol-update-003

User Research Proposal: Improving Ethereum User Experience ## Executive Summary This proposal outlines a comprehensive user research initiative to support Ethereum's "Improve UX" strategic track. The research will identify key pain points, barriers, and opportunities to create a more seamless, secure, and permissionless experience across the Ethereum ecosystem. ## Research Objectives **Primary Objective:** Understand how to make Ethereum more accessible and user-friendly while maintaining its core principles of decentralization and security. **Secondary Objectives:** - Map the current user j...

Protocol Update 002 - Scale Blobs

Published: August 22, 2025

Link: https://blog.ethereum.org/en/2025/08/22/protocol-update-002

User Research Proposal: Understanding Developer Experience and Decision-Making in Ethereum L2 Data Availability Solutions ## Research Overview Based on the Protocol Update 001 content regarding blob scaling and L1/L2 data availability architecture, we propose conducting comprehensive user research to understand how developers interact with, evaluate, and implement Ethereum's scaling solutions. ## Research Objectives ### Primary Objectives - **Understand developer mental models** of L1/L2 data availability relationships - **Identify pain points and friction** in implementing blob scaling solu...

Arbitrum Medium

Most profitable SushiSwap liquidity pool ArbiFLUX-ETH — 162.44% APY

User Research Proposal: Understanding DeFi Liquidity Provider Behavior and Decision-Making ## Executive Summary Based on the ArbiFLUX-ETH liquidity pool case study, we propose conducting comprehensive user research to understand how DeFi users evaluate, participate in, and manage high-yield liquidity provision opportunities. This research will provide insights into user motivations, risk assessment behaviors, and decision-making processes in the evolving DeFi landscape. ## Research Objectives ### Primary Objectives 1. **Understanding User Motivation**: Investigate what drives users to partic...

Binance, Arbitrum One Integration, Datamine Network

Published: November 20, 2021

User Research Proposal: Understanding DeFi User Behavior in Layer 2 Scaling Solutions ## Background & Opportunity The integration of Arbitrum One Layer 2 with major exchanges like Binance represents a significant shift in DeFi accessibility. With projects like datamine.network experiencing substantial price increases and user adoption following this integration, there's a critical need to understand how users navigate and adopt Layer 2 solutions. ## Research Objectives ### Primary Objective Understand user behavior, decision-making processes, and pain points when transitioning from Layer 1 (...
